

Linux~#

this is a essential skill that every hacker should know.

We can learn Linux by mastering the book by ~OTW~

``Linux Basics For Hackers``

You can Also watch Youtubevid to learn Linux

the books will be in `habooks` repo

Network~#

If Linux in blood then Networking is heart.

We will learn many topics of Networking in Hacking perspective

WE will use a book by ~OTW~

``Network Basics For Hackers``

You can buy the book but for getting a digital copy in free of cost, you can join any telegram channel releted to hacking , you will find.

You can Also watch Youtubevid to learn Network

Ethical Hacking~#

``Module 01: Introduction to Ethical Hacking - Covers information security basics, ethical hacking concepts, security controls, and cyber laws.``

``Module 02: Footprinting and Reconnaissance - Teaches intelligence gathering and OSINT techniques to map target attack surfaces.``

``Module 03: Scanning Networks - Explores network scanning methodologies, host discovery, and port scanning tools.``

``Module 04: Enumeration - Focuses on active information extraction like SMB, SNMP, and NetBIOS enumeration.``

``Module 05: Vulnerability Analysis - Identifies security weaknesses and flaws in target systems before exploitation.``

``Module 06: System Hacking - Covers password cracking, escalating privileges, executing applications, and hiding files.``

``Module 07: Malware Threats - Analyzes Trojans, viruses, ransomware, and AI-generated malware mechanics.``

``Module 08: Sniffing - Explains network traffic analysis, MAC flooding, and ARP poisoning detection.``

``Module 09: Social Engineering - Examines human-based attacks including phishing, spear-phishing, and deepfake manipulation.``

``Module 10: Denial-of-Service (DoS/DDoS) - Looks at availability disruption techniques and mitigation tactics.``

``Module 11: Session Hijacking - Teaches how attackers take over valid user sessions and preventive controls.``

`Module 12: Evading IDS, Firewalls, and Honeypots - Demonstrates bypass methods for perimeter security controls.`

`Module 13: Hacking Web Servers - Focuses on web server vulnerabilities, attack vectors, and patching strategies.`

`Module 14: Hacking Web Applications - Explores web app architectures, OWASP Top 10 vulnerabilities, and testing.`

`Module 15: SQL Injection - Covers database attack mechanisms, injection testing, and secure coding fixes.`

`Module 16: Hacking Wireless Networks - Teaches Wi-Fi encryption weaknesses, rogue access points, and wireless sniffing.`

`Module 17: Hacking Mobile Platforms - Analyzes Android and iOS security models, application flaws, and mobile device management.`

`Module 18: IoT and OT Hacking - Explores connected smart device risks, industrial control systems, and hardware security.`

`Module 19: Cloud Computing - Covers cloud service models (IaaS, PaaS, SaaS), shared responsibility, and misconfigurations.`

`Module 20: Cryptography - Explores encryption algorithms, public-key infrastructure, and post-quantum cryptography.`

These are the topics we have to know in basics. After this you can go with any fields of Hacking.

Books we have to read are:

1. Getting Started Becoming a Master Hacker
2. Black Hat Python
3. Hacking The Art of Exploitation 2nd edition
4. The Web Application Hacker's Handbook 2nd edition
5. Serious Cryptography

OSINT~#

The first step of hacking is OSINT - Open Source INTElligent

There is no book btw for OSINT but we can join the "C|OSINT|P" - Certification

It will teach us a lot about OSINT. We can also watch vids About OSINT but watch from reliable source means channel.

1. GIAC Open Source Intelligence (GOSI)

Course Modules:

- * OSINT Fundamentals
- * Intelligence Lifecycle
- * OSINT Methodology
- * Investigation Planning
- * Search Engine Intelligence
- * Advanced Search Operators

- * Social Media Intelligence
- * Username Investigations
- * Email Investigations
- * Domain Intelligence
- * Website Reconnaissance
- * Public Records Research
- * Image Intelligence
- * Video Verification
- * Geolocation
- * Metadata Analysis
- * Dark Web Research
- * Data Collection
- * Data Analysis
- * Intelligence Reporting
- * Evidence Preservation
- * Investigator OPSEC
- * Legal & Ethical Considerations

2. GIAC Strategic OSINT Analyst (GSOA)

Course Modules:

- * Advanced OSINT Methodology
- * Strategic Intelligence
- * Intelligence Analysis
- * Information Reliability
- * Admiralty Code
- * CRAAP Analysis
- * Analysis of Competing Hypotheses
- * Advanced Search Techniques
- * Social Platform Investigations
- * Disinformation Investigations
- * Russian OSINT
- * Chinese OSINT
- * Dark Web Investigations
- * Cryptocurrency Investigations
- * Blockchain Intelligence
- * Threat Actor Research
- * Adversarial Infrastructure
- * Large-Scale OSINT Collection
- * Python Automation
- * Data Analysis
- * Persona Management

- * Investigator OPSEC
- * Complex Investigations
- * Intelligence Reporting

3. OSINT Combine / Advanced OSINT Investigator

Course Modules:

- * OSINT Fundamentals
- * Investigation Methodology
- * Search Engine Research
- * Advanced Search Operators
- * Social Media Research
- * Username Enumeration
- * Email Investigation
- * Phone Number Research
- * Name & Alias Research
- * Domain Investigation
- * DNS Intelligence
- * IP Investigation
- * Infrastructure Mapping
- * Website Intelligence
- * Image Investigation
- * Reverse Image Search
- * Video Investigation
- * Geolocation
- * Metadata Analysis
- * Public Records
- * Data Correlation
- * Digital Footprint Analysis
- * Investigation Reporting
- * Evidence Handling
- * OPSEC

4. McAfee Institute Certified OSINT Investigator

Course Modules:

- * OSINT Fundamentals
- * Intelligence Gathering
- * Investigation Planning
- * Search Engine Intelligence
- * Social Media Investigations
- * Digital Footprint Analysis
- * Username Research

- * Email Research
- * Phone Research
- * Name & Alias Research
- * Image Research
- * Geolocation
- * Public Records
- * Website Research
- * Domain Intelligence
- * Dark Web Intelligence
- * Data Analysis
- * Case Management
- * Evidence Documentation
- * Intelligence Reporting
- * Legal Considerations
- * Ethical Considerations
- * Investigator OPSEC

5. Bellingcat OSINT Training

Course Modules:

- * Open-Source Investigation Fundamentals
- * Online Research Methodology
- * Advanced Web Research
- * Search Engine Techniques
- * Social Media Investigation
- * Image Verification
- * Reverse Image Search
- * Video Verification
- * Geolocation
- * Chronolocation
- * Satellite Imagery
- * Map Research
- * OpenStreetMap Research
- * Transportation Research
- * Flight Tracking
- * Vessel Tracking
- * Archive Research
- * Website Archiving
- * Document Investigation
- * Source Verification
- * Timeline Construction
- * Evidence Preservation

- * Investigation Reporting

6. Berkeley Protocol / Open-Source Investigation Training

Course Modules:

- * Open-Source Investigation Principles

- * Investigation Planning

- * Research Questions

- * Source Identification

- * Source Evaluation

- * Digital Evidence

- * Evidence Collection

- * Evidence Preservation

- * Image Verification

- * Video Verification

- * Geolocation

- * Chronolocation

- * Metadata

- * Web Archiving

- * Documentation

- * Chain of Custody

- * Verification Methodology

- * Corroboration

- * Timeline Analysis

- * Investigation Reporting

- * Ethical Considerations

- * Investigator Safety

7. INE Cybersecurity OSINT Training

Course Modules:

- * OSINT Fundamentals

- * Reconnaissance Fundamentals

- * Search Engines

- * Advanced Search Operators

- * Google Dorking

- * DNS Reconnaissance

- * WHOIS & RDAP

- * IP Intelligence

- * ASN Intelligence

- * Subdomain Enumeration

- * Certificate Transparency

- * Email Discovery

- * Username Discovery
- * Social Network Intelligence
- * Website Reconnaissance
- * Technology Fingerprinting
- * Metadata Analysis
- * Attack Surface Discovery
- * Infrastructure Intelligence
- * Threat Intelligence
- * Data Correlation
- * Reporting

8. TCM Security OSINT Training

Course Modules:

- * OSINT Fundamentals
- * Reconnaissance Methodology
- * Search Engines
- * Google Dorking
- * Advanced Search Operators
- * Email OSINT
- * Username OSINT
- * Social Media Research
- * Domain Enumeration
- * DNS Enumeration
- * WHOIS
- * Subdomain Enumeration
- * IP Intelligence
- * Website Reconnaissance
- * Metadata Analysis
- * Image OSINT
- * Digital Footprint Analysis
- * Breach Exposure Research
- * Infrastructure Discovery
- * Intelligence Correlation
- * Investigation Reporting
- * OPSEC

9. OSINT Dojo Training / Certification Paths

Course Modules:

- * OSINT Fundamentals
- * Investigation Methodology
- * Search Engine Intelligence

- * Advanced Search
- * Social Media Intelligence
- * Username Hunting
- * Email Investigation
- * Phone Number Research
- * Image Analysis
- * Reverse Image Search
- * Geolocation
- * Website Investigation
- * Domain Research
- * Metadata Analysis
- * Public Records
- * Infrastructure Research
- * Digital Footprints
- * Data Correlation
- * Evidence Collection
- * Investigation Documentation
- * Practical OSINT Challenges
- * Case-Based Investigations

10. Cyber Threat Intelligence Certifications

Course Modules:

- * Threat Intelligence Fundamentals
- * Intelligence Lifecycle
- * Threat Intelligence Requirements
- * Threat Actor Profiling
- * Threat Actor Infrastructure
- * IOC Collection
- * IOC Analysis
- * IP Intelligence
- * Domain Intelligence
- * Malware Intelligence
- * Malware Source Research
- * Dark Web Monitoring
- * Forum Intelligence
- * Threat Campaign Analysis
- * Attack Infrastructure Tracking
- * MITRE ATT&CK
- * Attribution
- * Adversary Tactics & Techniques
- * Intelligence Analysis

- * Data Correlation
- * Threat Hunting Intelligence
- * Intelligence Reporting
- * Intelligence Dissemination

11. C|OSINT|P — Certified OSINT Professional

Course Modules:

- * OSINT Fundamentals
- * OSINT Methodology
- * Intelligence Lifecycle
- * Legal & Ethical Boundaries
- * Investigator OPSEC
- * Investigation Planning
- * Search Engine Intelligence
- * Advanced Search Operators
- * Google Dorking
- * Social Media Intelligence
- * Username Investigation
- * Email Investigation
- * Phone Number OSINT
- * Name & Alias Investigation
- * Digital Footprint Analysis
- * Domain Intelligence
- * DNS Intelligence
- * WHOIS & RDAP
- * IP Address Intelligence
- * ASN Intelligence
- * Subdomain Enumeration
- * Certificate Transparency
- * Website Intelligence
- * Web Archive Investigation
- * Metadata Analysis
- * EXIF Analysis
- * Image OSINT
- * Reverse Image Search
- * Image Verification
- * Video OSINT
- * Video Verification
- * Geolocation
- * Chronolocation
- * Satellite Imagery Analysis

- * Map Intelligence
- * Transportation OSINT
- * Public Records Research
- * Corporate Intelligence
- * Business Intelligence
- * Document Intelligence
- * PDF & File Metadata
- * GitHub Intelligence
- * Code Repository OSINT
- * Breach Exposure Research
- * Dark Web Fundamentals
- * Dark Web OSINT
- * Forum Intelligence
- * Telegram OSINT
- * Reddit OSINT
- * Discord OSINT
- * Threat Actor Research
- * Cyber Threat Intelligence
- * IOC Research
- * Infrastructure Mapping
- * Digital Infrastructure Correlation
- * Cryptocurrency OSINT
- * Blockchain Intelligence
- * Disinformation Investigation
- * Misinformation Analysis
- * Source Verification
- * Information Reliability Assessment
- * Timeline Analysis
- * Entity Resolution
- * Link Analysis
- * Relationship Mapping
- * Data Correlation
- * OSINT Automation
- * Python for OSINT
- * APIs for OSINT
- * Data Collection
- * Data Processing
- * Data Visualization
- * Investigation Documentation
- * Evidence Preservation
- * Intelligence Reporting

- * Case Management
- * Advanced Investigation Techniques
- * Capstone Investigation

Learning this can make you a beast of OSINT btw.

Social Engineering~#

This is a Hacking technique but used for Human. Means this plays with human psychology and force them to give access.

BOOKs~\$ Ghost In The Wires
